The Boston Case, 1850-84," and "Twentieth Century School Reform: Notes Toward a History." "The major purpose of this book," the author says in his introduction, is to "develop the strength of will and clear judgment that come from an ability to confront both past and present as they actually exist" with the help of history. He concludes his well-documented historical assessment with four broad programs to deal with the problems of urban education.

Contract Administration Guide for School Administrators. Thomas W. Hill, Cornelius P. Quinn, and Bruce D. Wood. Chicago, Ill.: The Dartnell Corporation, 1971. Pp. 208. 47.50.

The school administrator has lost his status as an educator and must recognize his new role as a member of the management team, say the authors of this manual. Written as a companion volume to *Collective Bargaining Guide for School Administrators,* this book is designed to aid the school administrator in the handling of the complex and often bewildering challenges of modern school management under a negotiated contract.

Section headings include: "Basic Political Realities," "The Principal," "Motivation," "The New Role of Evaluation," "Discipline," "Grievance-Handling," and "Arbitration." Another section discusses concerted, aggressive action on the part of the work force, including "refusal of duties," "wildcat strikes," and "extraordinary harassments."

The last section contains grievance arbitration exhibits which have been taken from actual cases.

Index to Volume XXXVII (1971-1972)

Items are listed under author's name. The month indicated is the issue of *The Education Digest* in which the article appears, while the number is that of the page on which the article starts.
